

RUBY: Parser le nom du fichier et son extension

```
path = "/path/to/xyz.mp4"

File.basename(path)           # => "xyz.mp4"
File.extname(path)            # => ".mp4"
File.basename(path, ".mp4")   # => "xyz"
File.basename(path, ".*")     # => "xyz"
File.dirname(path)            # => "/path/to"
```
